Introduction to Your Team Selection Report

Thank you for choosing an LPL Ltd. product. This Team-Selection report is designed to identify the single most emotionally coherent subgroup from a larger pool of participants. If your goal is to allocate a pool of participants into smaller groups for optimal emotional compatibility, we recommend the TEIQue Group-Sort report.

The TEIQue Team-Selection report utilizes the "Potential for Emotional Conflict" index from our standard Team Trait EI reports. This index is expressed as a percentage ranging from 1% to 100%, with higher percentages indicating an increased likelihood of emotional conflicts.

For this application, we calculate the index across all possible combinations of participants to identify the most suitable group of the desired size based on your specifications and optimized for emotional harmony. We also provide two additional, near-optimal groupings for further flexibility.

Example areas of application for this TEIQue report include:

- Assessment
- Brainstorming
- Development
- Innovation
- Networking
- Performance
- Team-building
- Training

Thank you again for your trust in LPL Ltd. We look forward to supporting your organization's growth and success.

Sincerely,
London Psychometric
